ABOUT THE INSTALLATION

Please state below details of all the current activities in operation at the whole installation.

Please identify all activities listed in Schedule 1 to the EP regulations that are, or are proposed, to be carried out in the stationary technical unit of the installation.

Please identify any directly associated activities that are, or are proposed, to be carried out on the same site which:

- * Have a technical connection with the activities in the stationary technical unit
- * Could have an effect on pollution.

Please quote the chapter number, section number, then paragraph and sub-paragraph number as shown in Part 2 of schedule 1 to the EP regulations [For example, manufacturing glass and glass fibre where the use of lead or any lead compound is involved, would be listed as chapter 3, section 3.3, part B(b)].

Activities in the stationary technical unit

The incineration in a small waste incineration plant with an aggregate capacity of 50 kilograms or more per hour of wood waste

Schedule 1 reference

Directly associated activities

Storage of wood

Schedule 1 reference

Why Is The Application Being Made?

- The installation is new
- The installation is existing, but changes to the installation or to the EP regulations means that an LAPPC Part B permit is now required.

Site Maps

Please provide a suitable map showing the location of the installation, clearly defining the chimney location and oil storage tank

Document reference

Please provide a suitable plan showing the layout of activities on the site, including bulk storage of materials, waste storage areas and any external emission points to atmosphere

Section 5 of 11

THE INSTALLATION

Please provide information about the aspects of your installation. We need this information to determine whether you will operate the installation in a way in which all the environmental requirements of the EP Regulations are met.

Describe the proposed installation and activities and identify the foreseeable emissions to air from each stage of the process (this will include any foreseeable emissions during start up, shut down and any breakdown/abnormal operation). The use of process flow diagrams may aid to simplify the operations.

Details and/or document reference if attachment

Please refer to document ref: 3650-2272-A and 3650-2272-B for supporting information and Environmental Management System (EMS) for the installation containing a description of the installation, activities and potential emissions to air, together with site management procedures.

Once all foreseeable emissions have been identified in the proposed installation activities, each emission should be characterised (including odour) and quantified.

Atmospheric emissions should be categorised under the following

- i. Point source, (e.g. chimney / vent, identified by a number and detailed on a plan)
- ii. Fugitive source (e.g. from stockpiles / storage areas).

If any monitoring has been undertaken please provide the details of emission concentrations and quantify in terms of mass emissions. If no monitoring has been undertaken please state this.

(Emission concentration = e.g. milligrams per cubic metre of air; mass emission = e.g. grams per hour, tonnes per year)

Details and/or document reference if attachment

Please refer to document ref: 3650-2272-A for supporting information containing details of potential stack emissions.

For each emission identified from the installations' activities describe the current and proposed technology and other techniques for preventing or, where that is not practicable, reducing the emissions into the air. If no techniques are currently used and the emission goes directly to the environment, without abatement or treatment then this should be stated.

Details and/or document reference if attachment

Please refer to document ref: 3650-2272-A and 3650-2272-B for supporting information containing a description of air emissions abatement methods.

Describe the proposed systems to be used in the event of unintentional releases and their consequences. This must identify, assess and minimise the environmental risks and hazards, provide a risk based assessment of any likely unintentional releases, including the use of historical evidence. If no assessments have been carried out please state.

Details and/or document reference if attachment

No assessment undertaken.

Describe the proposed measures for monitoring all identified emissions including any environmental monitoring, and the frequency, measurement methodology and evaluation procedure proposed (e.g. particulate matter emissions, odour etc). Include the details of any monitoring which has been carried out which has not been requested in any other part of this application. If no monitoring is proposed for an emission please state the reason.

Continued from previous page...

Details and/or document reference if attachment

Please refer to Document ref: 3650-2272-A which contains details of proposed emissions monitoring.

Provide detailed procedures and policies of your proposed environmental management techniques, in relation to the installation activities described.

Details and/or document reference if attachment

Please refer to document ref: 3650-2272-B for an Environmental Management System for the installation (contained in Appendix IV of document ref: 3650-2272-A).

Section 6 of 11

IMPACT ON THE ENVIRONMENT

Provide an assessment of the potential significant local environmental effects of the foreseeable emissions (e.g. is there a history of complaints and/or is the installation in an air quality management area ?)

Details and/or document reference if attachment

Please refer to document ref: 3650-2272-A for an assessment of potential significant local environmental effects. Dispersion modelling has been undertaken to assess potential impacts. This has concluded that impacts will not be significant. Please refer to document ref: 3650-2272-C for the emissions modelling assessment.

Are there any Sites of Special Scientific Interest (SSSIs) or European protected sites which are within either;

- 2 kilometres - for an installation which includes part B combustion, incineration (but not crematoria), iron and steel and non-ferrous metal activities
- 1 kilometre - for Part B mineral activities and cement and lime activities
- ½ a kilometre - for all other part B activities.
